## Environmental Economics

**Department : Economics**

**Course : ECON3034**

**Semester : 1**

**Credits : 3**

**Prerequisite: ECON1000**

This course addresses issues by examining the underlying theories and the tools of environmental economics that can be used to effectively guide policymakers in dealing with environmental challenges. Specifically, from the very onset, it synchronizes classroom learning with what exists in the real world and also considers the multidisciplinary aspects of environmental problems, which makes it an exciting venture.
