

MonaSecure (UWI,MONA VPN)

Step 1

- To access MonaSecure, visit FortiClient.com (<https://forticlient.com/>).

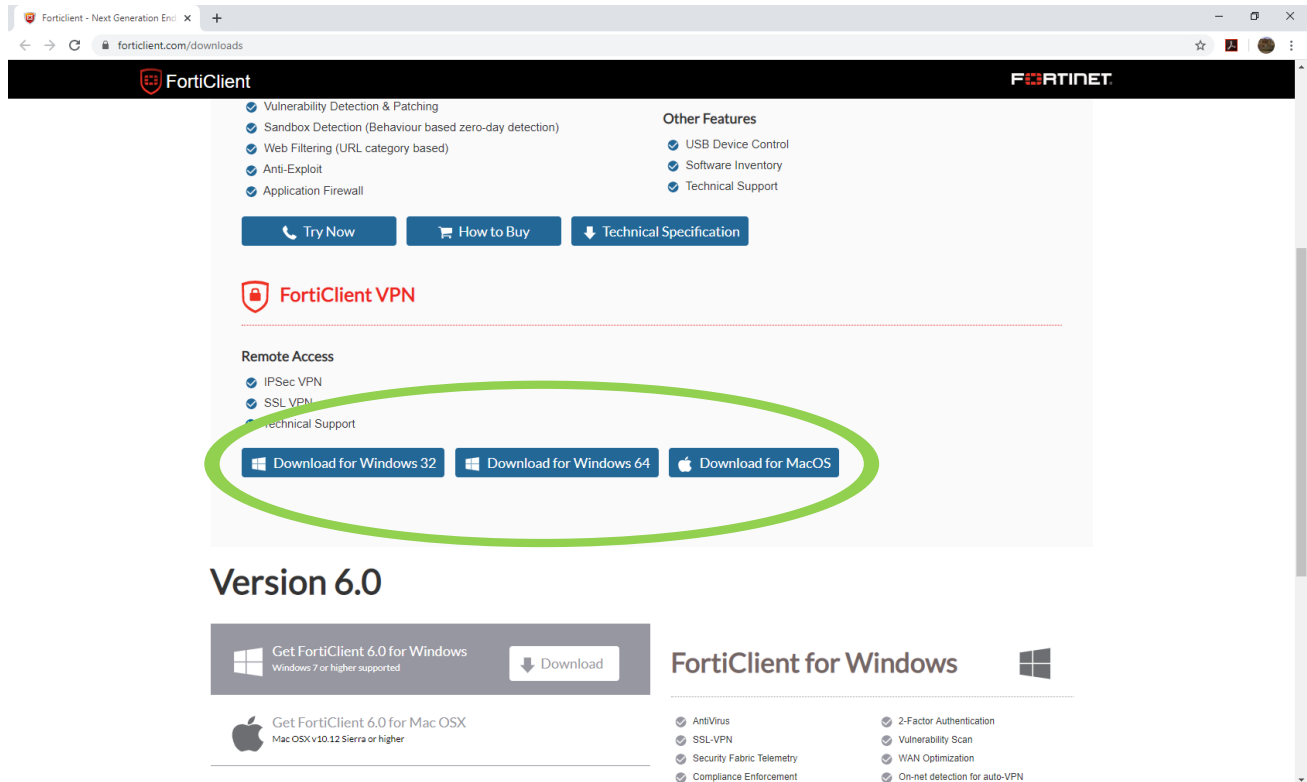

Step 2

- Select Download.

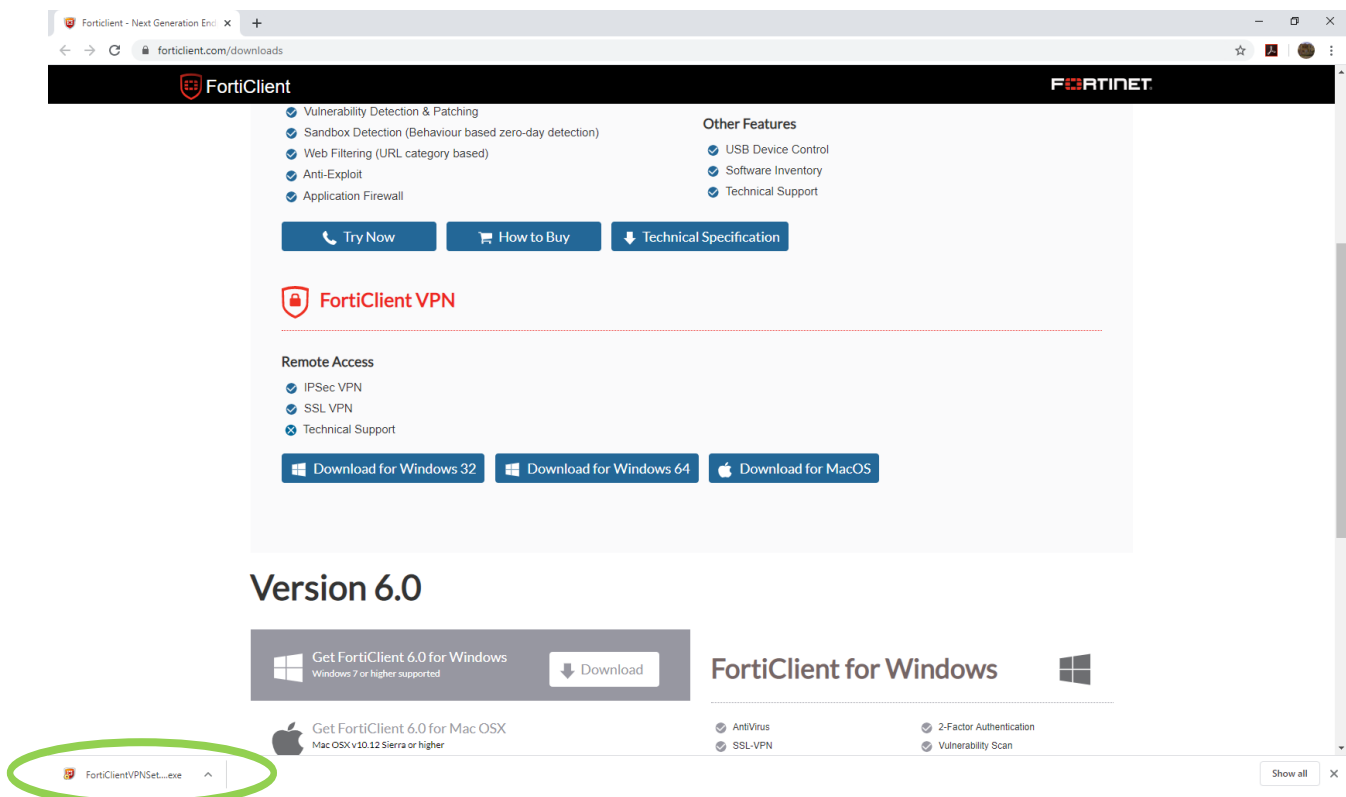

- Upon selecting download, the available OS will be shown. The system usually recognizes the appropriate FortiClient Operating System (OS) to download. However, if this does not happen select the correct OS as shown below.

Step 3

- Open the installer, usually at the bottom of the screen as seen below.

Step 4

- Select **Yes** and wait for the FortiClient installer to download and run.

Step 5

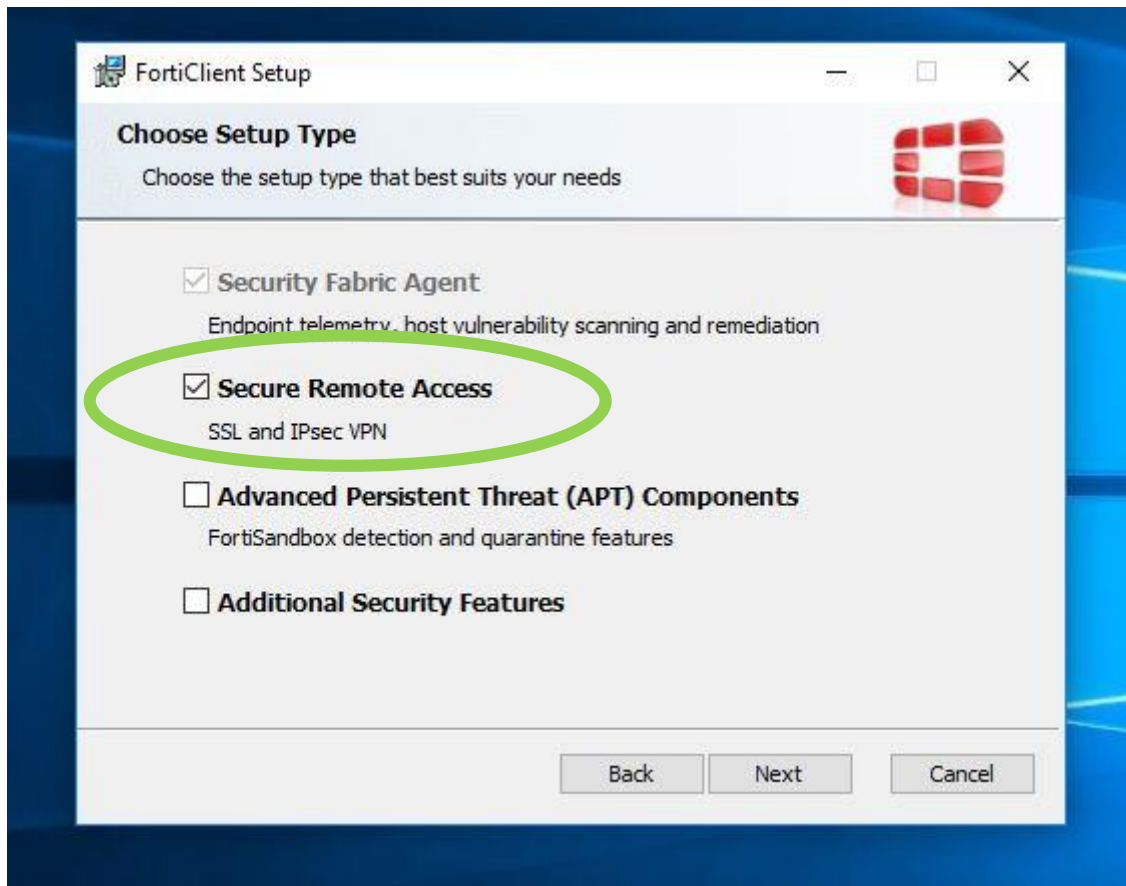

- Allow the Setup Wizard to install FortiClient on your computer.

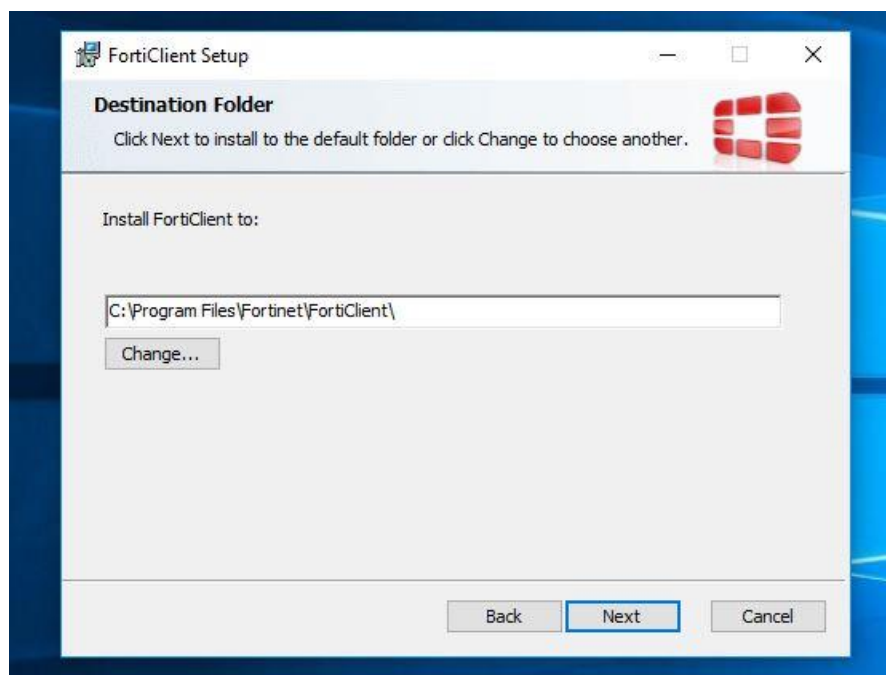

- Accept the license agreement

Step 6

- Choose the setup type which should be **Secure Remote Access**, select NEXT.

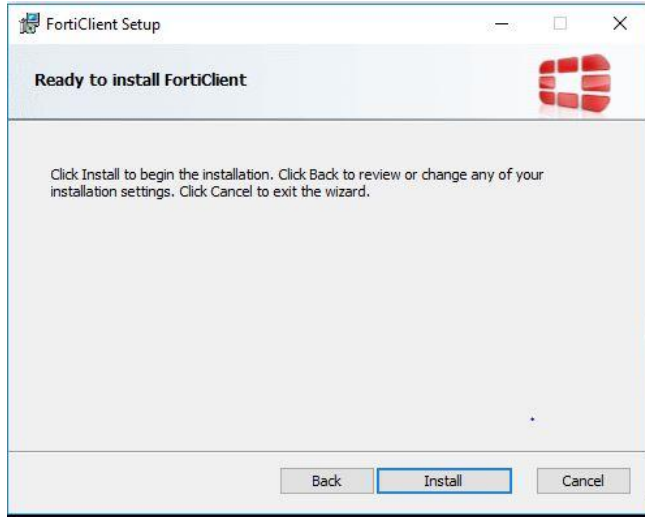

Step 7

- Select the folder where the FortiClient will be installed in, Select Next.

Step 8

- Begin Installation by selecting 'Install'.

Step 9

To complete Setup, select FINISH.

Step 10

After Installation is complete, open FortiClient using the Application saved in the folder from **Step 7**, then click  to **Add a New Connection**.

Step 11

Select **Remote Access** and **Configure**.

The screenshot shows the FortiClient VPN application window. The title bar reads "FortiClient -- The Security Fabric Agent". The main window has a blue header with the FortiClient logo and the text "FortiClient VPN". Below the header, there is a notification bar that says "Upgrade to the full version to access additional features and receive technical support." The main content area is titled "Edit VPN Connection". It features two tabs: "SSL-VPN" (selected) and "IPsec VPN". The configuration fields are as follows:

- VPN:** SSL-VPN (selected)
- Connection Name:** UWIVPN
- Description:** (empty)
- Remote Gateway:** vpn.mona.uwi.edu (with a close button 'x' and a "+Add Remote Gateway" link below it)
- Customize port:** Customize port 4433
- Client Certificate:** None (dropdown menu)
- Authentication:** Prompt on login, Save login, Do not Warn Invalid Server Certificate

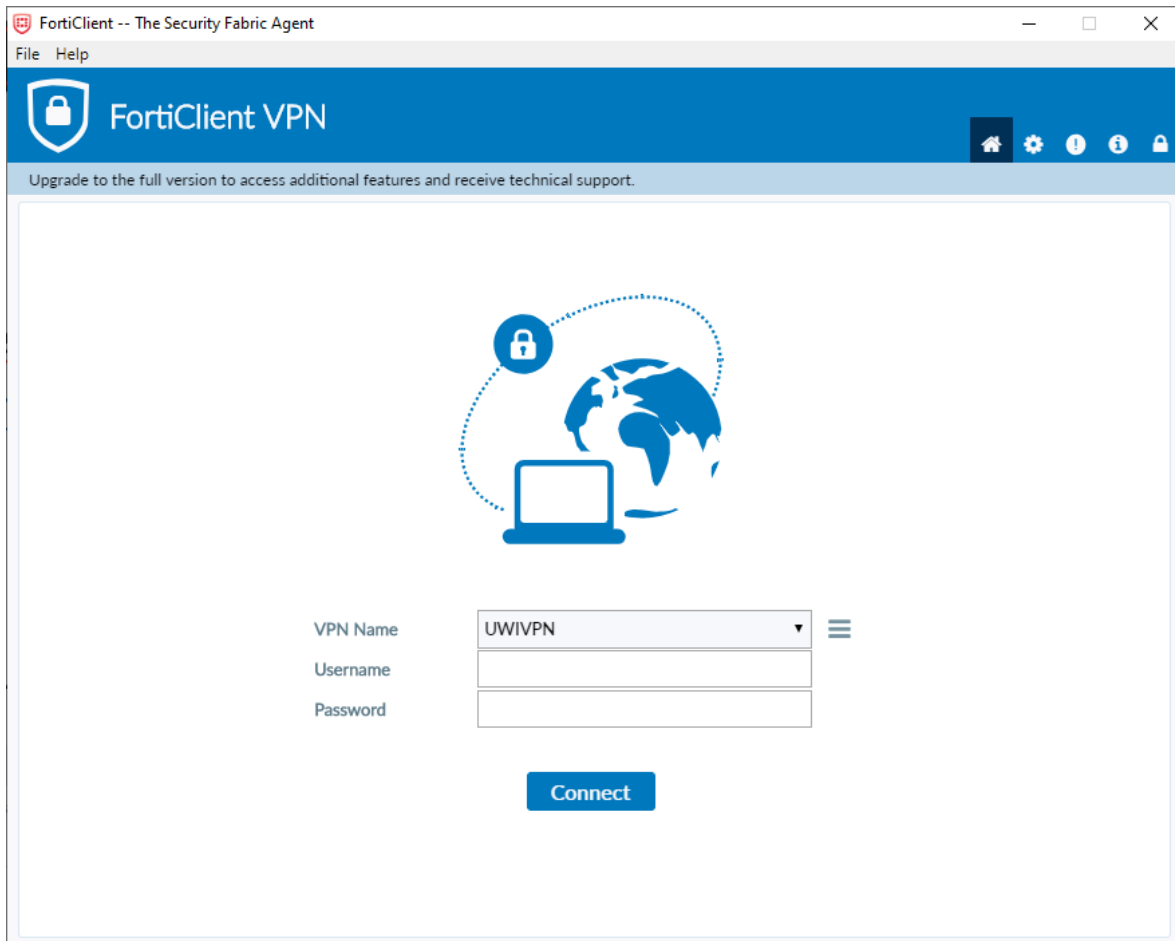

At the bottom of the dialog are two buttons: "Cancel" and "Save".

- Insert the Connection Name (UwiVPN)
- Insert Remote Gateway(vpn.mona.uwi.edu or vpn2.mona.uwi.edu) and Customize port as 4433.
- Leave Client Certificate as **None**
- Authentication should be Prompt on Login
- Select **SAVE**

Step 12

The remote access option will open as seen below:

- Choose VPN name (UWIVPN)
- Login using your UWI credentials

- Select **Connect**
- Connection will begin

Step 13

- After connection has been established, the information below should be displayed.
